New in the fleet!

LED TRAILER Mobile LED-screens

The large LED screen of 11.25 m² has a high attention value thanks to its high resolution, making it ideal for displaying advertising messages, crowd control at events and many other applications where video is required.

Because the LED screen is mounted on a trailer, it is easy to move between locations. The mobile LED screens are suitable for both indoor and outdoor use. The hydraulic construction mast is height adjustable to a maximum of 2.20 m (bottom of screen) and can be rotated 360 degrees.

In addition to rental of the LED screens, we can provide support in power supplies.

Screen 360° rotatable
