NANO 30 CS & PT CS

Electric mastlift

The Power Tower CS and Nano 30CS are compact aerial work platforms for safe working in confined spaces. The Power Tower CS offers a working height of 5 meters and a platform capacity of 250 kg, ideal for a single operator with tools. Thanks to its narrow 0.78 m width and 0.55 x 0.55 m platform, it easily maneuvers through standard doorways.

The Nano 30CS reaches a working height of 4.95 meters and combines this with a platform capacity of 200 kg. With compact dimensions and user-friendly controls, both units offer reliable performance for maintenance and installation work.

100% electric
